Internship Experience

Web Developer Intern, GIIT Solutions

Jan 2024 - June 2024

- Led the development of a scalable blogging platform (Live) using Node.js, Express.js, MongoDB, React.js.
- Engineered secure user authentication with Firebase and developed RESTful APIs.
- Designed and developed an Admin Dashboard and CRUD functionalities for blog posts and comments. Utilized Tailwind CSS for a responsive and appealing UI.
- Utilized Figma for basic wireframing and UI/UX design collaboration.
- Optimized the in-house websites, enhancing performance, reliability, and user experience.

Front End Developer Intern, The Bommber

Aug 2024 – Present

- Developed and maintained web pages using React.js, ensuring responsive design and seamless user experience for the startup's website.
- Integrated RESTful APIs to dynamically fetch and render data from the backend and collaborated remotely with the development team to enhance website functionality.

Technical Projects

Expense Tracker - Github | MERN Stack

- Led a team of three in architecting and developing a user-friendly expense tracking system using Node.js, MySQL , React.js and Express.js
- Implemented key features such as expense creation, management, categorization, and analysis, ensuring a seamless user experience.
- Created data visualization tools using Chart.js to provide clear breakdowns of expenses and income by category.

• Executed comprehensive testing and quality assurance processes, ensuring a high-quality, reliable software product.

CryptoVerse - Github | JavaScript, ReactJs

- Developed a responsive cryptocurrency information platform using HTML5, CSS3, JavaScript, and React.js, centralizing all relevant data in one place.
- Integrated APIs such as CoinGecko and Bing News to fetch real-time cryptocurrency data and news, enhancing the platform's functionality.
- Utilized the Chart.js library to display dynamic price history charts, and employed Ant Design to craft an intuitive and visually appealing user interface.

Plant Ease | WordPress

- •Developed a practice plant care tracking website using WordPress, featuring tools for growth tracking, watering schedules, and maintenance logs.
- •Designed and customized themes, and implemented plugins to add dynamic functionality tailored to plant care needs.
- Gained hands-on experience with WordPress CMS, theme customization, and plugin integration.

Certifications

MERN Stack Web Development Bootcamp - Udemy (2023)
